EXPERIENCE

BUSINESS SYSTEMS ANALYST (HMIS) - PROJECT MANAGER

11/2023 to CURRENT

Amador Tuolumne Community Action Agency (ATCAA) | Jackson, California

Enterprise system administration, business process analysis, and multi-agency data system support

- Manage the Homeless Management Information System (HMIS) across a four-county Continuum of Care, ensuring accurate tracking, compliance, and

reporting of housing program outcomes.

- Oversee data quality and compliance, reducing reporting errors through quarterly audits and aligning outputs with federal and state guidelines.
- Design and deliver HMIS trainings for staff and partner agencies, increasing adoption of best practices and strengthening reporting accuracy.
- Develop analytics dashboards and reporting tools (Tableau, Excel) for leadership and funders to support data-driven decision-making and strategic planning.
- Facilitate cross-agency collaboration with 12 partner organizations to resolve data issues, align reporting standards, and integrate program data across the regional Continuum of Care.
- Conduct business process analysis across partner agencies to improve HMIS workflows, reporting accuracy, and compliance with federal HUD data standards.
- Lead system configuration changes and data structure improvements within HMIS to support new reporting requirements and improve data integrity.
- Completed the HUD Longitudinal System Analysis (LSA) submission in one week, reducing prior completion time from two months.
- Perform statistical analysis and data validation using Python, SQL, and Excel to support program evaluation, performance measurement, and policy reporting.
- Monitor program performance metrics and support evaluation of outcomes across multiple partner agencies to inform funding and policy decisions.
- Coordinate with community organizations and public agencies to align program operations, reporting standards, and service delivery goals.

MORTGAGE LOAN OFFICER

10/2005 to 12/2016

Self Employed

- Built and operated independent mortgage brokerage.
- Managed loan processing workflow and coordinated with escrow officers, notaries, and lenders.
- Provided financial analysis and loan structuring for residential and commercial clients, evaluating risk, interest structures, and repayment scenarios.
